

INSTALLATION AND OPERATION MANUAL

FVTDR101B Transmitter

FVRDT10M1 Receiver

VIDEO WITH RETURN DATA

The ComNet™ FVTDR101B for the Bosch dome camera system supports the simultaneous transmission of video in one direction and pan tilt and zoom control signals in the reverse direction.

The FVTDR101B supports RS-232 and RS-422 data signals from the receiver to the transmitter and outputs RS-422 data into the Bosch dome. See **Figure 4** on **Page 3** for Data Connection Settings.

Bi-color (Red/Green) LED indicators on the receiver are provided for rapidly ascertaining equipment operating status. See **Figure 5** on **Page 3** for an explanation of each LED indicator.

The FVTDR101B is camera mounted and powered by the camera's internal power supply. The module is compatible with the ComNet FVRDT10M1 receiver, which is interchangeable between stand-alone or card mount configurations. See **Figure A** on **Page 4** for mounting instructions.

See **Figures 1 – 5** for complete installation details.

OFF	Not powered up correctly	Not powered up correctly

NOTE: Red Does Not Mean "Error"

MECHANICAL INSTALLATION INSTRUCTIONS

INSTALLATION CONSIDERATIONS

This fiber-optic link is supplied as a Standalone/Rack module. Units should be installed in dry locations protected from extremes of temperature and humidity.

C1-US, C1-EU, C1-AU OR C1-CH CARD CAGE RACKS

CAUTION: Although the units are hot-swappable and may be installed without turning power off to the rack, ComNet recommends that the power supply be turned off and that the rack power supply is disconnected from any power source. **Note:** Remove electrical connector before installing in card cage rack.

1. Make sure that the card is oriented right side up, and slide it into the card guides in the rack until the edge connector at the back of the card seats in the corresponding slot in the rack's connector panel. Seating may require thumb pressure on the top and bottom of the card's front panel.

CAUTION: Take care not to press on any of the LEDs.

2. Tighten the two thumb screws on the card until the front panel of the card is seated against the front of the rack.

WARNING: Unit is to be used with a Listed Class 2 or LPS power supply.

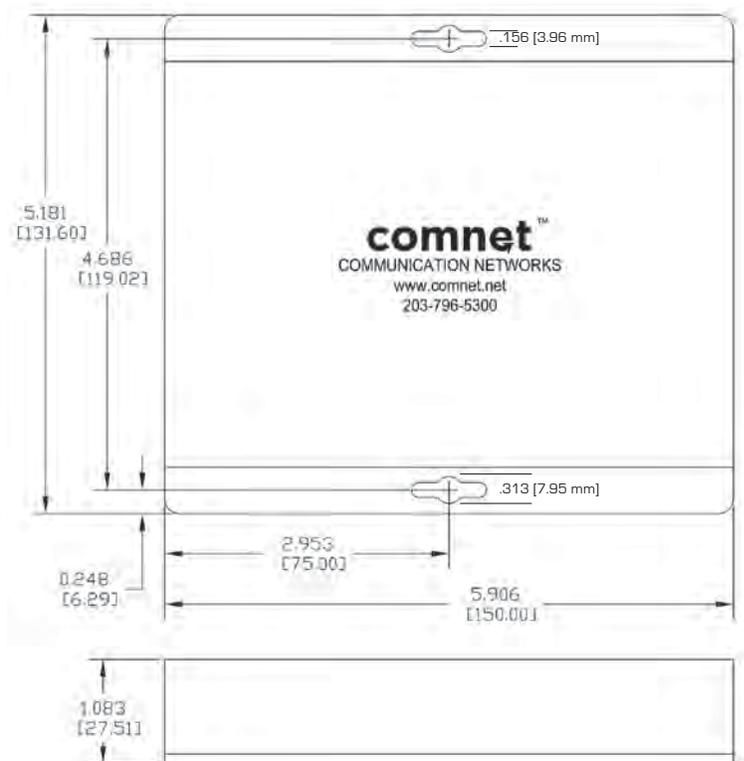

IMPORTANT SAFEGUARDS:

A) Elevated Operating Ambient - If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the maximum ambient temperature (T_{ma}) specified by the manufacturer.

B) Reduced Air Flow - Installation of the equipment in a rack should be such that the amount of air flow required for safe operation of the equipment is not compromised.
